SPRINGFEST EEB3

THE MECHANICAL DREAM

SYNOPSIS

Years ago, an inventor created a machine to help people escape from reality. This machine became so popular that people started using it all the time, so much that they became dependent on this machine to dream. Citizens lost their individuality and creativity. And the few people who could dream for themselves were forced into exile. The world became divided into groups the sleepers, citizens of a dependent society and dreamers, outlaws forced to live in the wild. But everything changes when a dreamer decides take matters in her own hands by turning off the machine, leaving the world in chaos and conflict.
